

MINI HOPPER PAN

MINOC20 MINI HOPPER PAN

It is crucial that the piglets start eating creep feeds as early as possible, as this will improve their adaptation in the post-weaning period where their feed source changes drastically.

- Hermetically sealed lid.
- Lid without edges avoids opening by piglets.
- Curved rim and wings to prevent feed wastage.
- Easy adjustment to ration the feed.
- Handle with arrow for rapid connection to any slatted floor.

TECHNICAL DATA	
Number of feeding outlets	5
Pan capacity, L.	2,6
Feeder capacity, L.	6
Height, cm	32
Diameter, cm	27

Easy adjustment

MINITAINER

153000P MINITAINER

It is a semi-transparent container linked to a Mini Pan, designed to dispense liquids to suckling piglets. For supplying milk or medication.

- More economic medication for the pen.
- Wide mouth for easy, fast filling/emptying of the container.
- Easy adaptation for the piglets.
- Visible contents.
- Coupling to immobilise the contents.
- Handle with arrow for rapid connection to any slatted floor.
- Without wastage: rounded edges.
