

Coolgro XP

Automatic drip and spray cooling controller for sheds or shelters.

Advantages :

- Set the optimum spray time and cycle time for the optimum cooling effect
- On-time settings: 0.5, 1, 2, 4, 6, 10, 15 and 20 minutes
- Cycle (off) time settings: 5, 7.5, 10, 15, 30 and 60 minutes
- Temperature settings 18 to 32 degrees celcius in 2 degree steps
- Operates 2 solenoid valves alternately (saves water pressure)
- Manually operate both solenoids independently
- LED indicator lights for above set temp, solenoid 1 on, solenoid 2 on, and invalid temp setting
- Low voltage wiring installation - no electrician needed - plugs into 240V outlet
- Coolgro kit also includes one 25mm solenoid valve, 25m cable, temperature probe and booklet
- Australian design, and made in Australia for Aussie pig farmers.

Cycling the timing of sprays or drippers over pigs during hot weather gives the best evaporation rates, and the best cooling effect, improving pig comfort and growth rates. Fully automatic operation lets you relax and get on with other things.
