

FIVE Dispenser

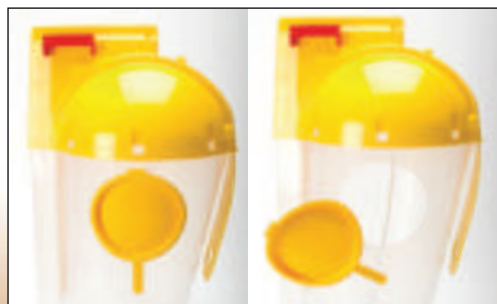

**FIVE,
The 1st dispenser
that Rotecna
distributes unassembled**

The FIVE becomes part of the great family of Rotecna dispensers, the only company that manufactures five different models. The wide range of dispensers includes both sophisticated and basic models that can be adapted to any kind of installations.

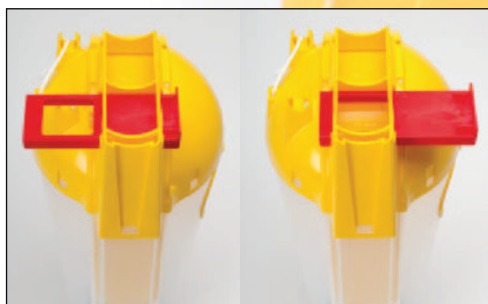

FIVE Dispenser

Wide front lid

Opening and closing lid

Measuring slide

The new FIVE is a ball dispenser with 7 liters capacity. It is distributed unassembled to optimize the transportation and obtaining important savings, reducing 50% transport cost.

The Five has been specially designed for easy and fast assembling.

FEATURES:

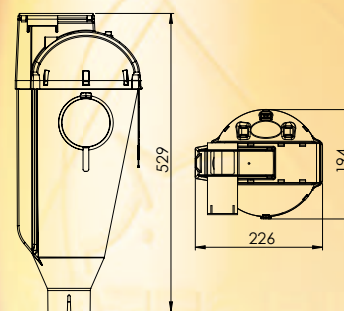

- 7 liters capacity.
- Distributed unassembled.
- Suitable for both tube and cable discharge systems.
- Easy to adjust.

ADVANTAGES:

- Stackable, big transport savings.
- More economical.
- Easy assembling.

USAGE:

- Suitable for farrowing and gestation.
