

# MINITAINER

Minitainer's evolution

## NEW ADVANTAGES

5 separators.

Reduce the liquid wastage.

Prevents that piglets make dirty the plate.

Without corners in order to facilitate cleaning.

# MINITAINER

Consolidated as the ideal product to dispensing liquids to the piglets in farrowing, Rotecna has redesigned the already successful Minitainer. The new model is offered without corners inside of the tank and with more divider wings.

The new Minitainer's separators, which are installed outside, are independent to the tank, that means a completely flat internal surface to clean easy.

The Minitainer maintains on the plate a constant liquid level. It is easy accessible for the piglets and without mechanism.

## ADVANTAGES

- Reduce the liquid wastage.
- Prevents that piglets make dirty the plate.
- Without corners in order to facilitate cleaning.
- Visible contents.
- More economic medication for the pen.
- Easy adaptation for the piglets.

## FEATURES

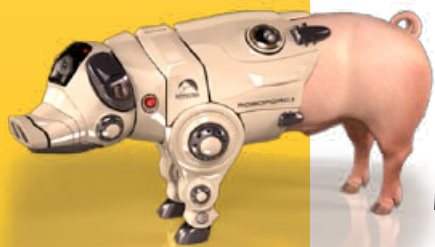

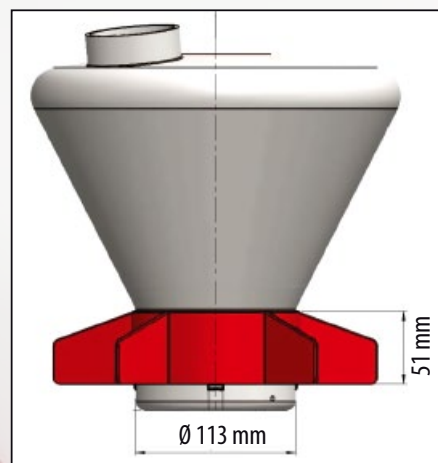

- 5 separators.
- 4 litres capacity.
- Semi-transparent recipient.
- Fixing suitable for plastic, concrete and metal slats.
- Wide inlet for easy, fast filling/emptying of the container.
- Coupling to immobilise the contents.
- Design with rounded edges.

## TECHNICAL DATA

Number of feeding outlets, 4  
Feeder capacity, 4 L.  
Height, 32 cm  
Diameter, 27 cm

## USAGE:

Suitable for farrowing.

Manufactured by: Rotecna.s.a.
