60x80 Round Weaner Slat

The 600x 800 slat is designed for flooring installations in weaning.

The big size of the slat reduces the investment in the support beams and the installation time.

Moreover, reduces the junctions between slats and dirty points, that helps to avoid infection focus.

DIMENSIONS:
• 600x800mm

This 60x80 cm slat's new feature can be found underneath: It has a double bridge running along its length that allows it to be cut, while still maintaining resistance and stability, for **2 slats 30x80 cm.**

THE DOUBLE REINFORCEMENT BRIDGE

provides for more resistance of the slat and allows cutting it: 30x80 cm + 30x80 cm.

60x80 ROUND WEANER SLAT

FEATURES:

- Wider: 80 cm
- Less junctions between slats.
- Less support beams.
- Very resistant and long-lasting.

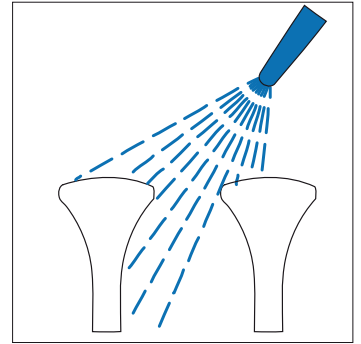

USAGE:

- Weaning rooms.

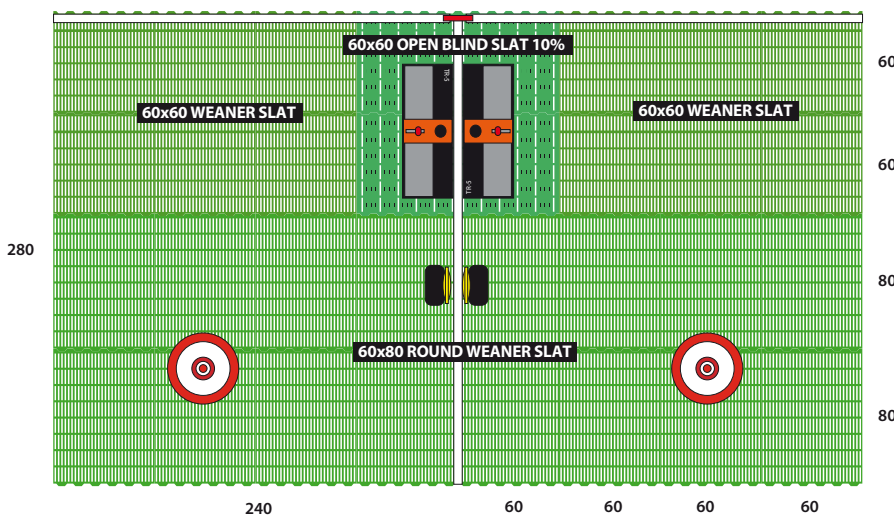

ADVANTAGES:

- Comfortable for weaners.
- Economic installation. The bigger size requires less support beams. More profitable usage.
- Easy to clean and disinfect. Due to its large size the joints between slats are reduced avoiding dirt accumulation.
- Easy and quick installation. Reducing the number of support beams less time for installation is required.

Convex rib design facilitates evacuation of excrements and cleaning.

EXAMPLE OF SLATS COMBINATIONS FOR WEANING PEN

What are the savings in the investment if I use the 60x80 slat?

- The reduction of support beams in %.
- The reduction of time of installation.

The comparison with other models of the slats.
